<b>Information about investment project</b>	
Full name of investment project	Organization and implementation of a system for collecting, sorting and utilization of solid waste in Kalush district
Prerequisites, that contribute to the project implementation	The urgency of the project is due to the fact that in recent years in the villages of the district there is a steady tendency of increasing amount of waste, in particular, the growth of volumes of plastic packaging products is determined. Annually about 35 - 40 thousand tons of rubbish are formed. Lack of landfill of solid waste. The presence of municipal enterprises (2 pcs.), Which carry out collection and transportation of solid waste.
Expected results after project implementation	Ensuring ecological and sanitary safety. Creating jobs The investment attractiveness of the district will improve.
UAH to USD exchange rate as at the date of information preparation	27,449
Total cost of project (thousand USD)	2500,0
Amount of investor's contribution (thousand USD)	2500,0
Required type of investor's contribution	Funds waste sorting line, waste recycling plant special transport special container.
Contribution of the initiator of the project	Land plots, (1 ha)
Stage of the project	Project idea (investment proposal)
Manner (form) of investment attraction	Establishment of joint venture Agreement on joint venture activity
Describe the process of cooperation with investor (in particular, what payment guaranties can be provided to investor )	
Expected payback period of project	10 years
Is it necessary to apply to the body of local government for acquisition of rights on the land plot	Yes
If it is necessary, what stage is the process of land plot allocation on	
Possible project risks	Unstable socio-political situation in the state; currency fluctuations, lack of funds, changes in the cost of capital and inflation.
Other important information about the project for investor	The main objective is to create an environmentally safe and cost-effective integrated waste management system in the area. Transition to the European system of collection and recycling of solid waste Main goals: <ul style="list-style-type: none"> <li>• Providing high-quality household waste collection services for the entire population of Kalu district at an affordable price;</li> <li>• Maximum recycling and other forms of recovery of resources, and as a result - achieve significant reduction of waste that is removed to landfills;</li> </ul>

	<ul style="list-style-type: none"> <li>• Reducing risks to the environment and public health through existing spontaneous landfills;</li> <li>• Avoiding unauthorized disposal of waste and reducing pollution by rivers and soils;</li> <li>• Increasing the investment attractiveness of the area as a result of improved waste management measures;</li> </ul>

<b>Information about investment project</b>	
Full name of investment project	Revival of flax in Kalush district using innovative non-waste technologies
Prerequisites, that contribute to the project implementation	Growing demand in the world for natural fibers. Today, only the machine-building industry in Western Europe needs 120,000 tons of fiber annually, and only 4,000 tons are produced there (3.5% of market demand). Favorable conditions for growing flax. Previously, peasant farms worked in the area, which cultivated this crop and processed it at a local plant. Availability of agricultural lands that are not used or used in part.
Expected results after project implementation	Construction of a flax processing plant. Creating jobs. Saturation of the market by competitive products. Export increase. Improvement of investment attractiveness of the district.
UAH to USD exchange rate as at the date of information preparation	27,449
Total cost of project (thousand USD)	10000,0
Amount of investor's contribution (thousand USD)	10000,0
Required type of investor's contribution	Funds Agricultural machinery Equipment for the plant (5000,0 thousand USD).
Contribution of the initiator of the project	Land plots, (2 ha)
Stage of the project	Project idea (investment proposal)
Manner (form) of investment attraction	Establishment of joint venture Agreement on joint venture activity
Describe the process of cooperation with investor (in particular, what payment guaranties can be provided to investor )	
Expected payback period of project	7 years
Is it necessary to apply to the body of local government for acquisition of rights on the land plot	Yes
If it is necessary, what stage is the process of land plot allocation on	
Possible project risks	Unstable socio-political situation in the state; currency fluctuations, lack of funds, changes in the cost of capital and inflation.
Other important information about the project for investor	The plant will produce flax fiber only for the needs of heavy industry. This direction in the future will only develop, because flax fiber is cheaper and it's twice as easy to make. Natural materials are lighter, which makes it possible to reduce the weight of a car or aircraft and, accordingly, fuel consumption.
